GREAT IMPROVEMENT IN DENTIS-

The attention of the public is called to a great discovery in Dentistry.

The attention of the public is called to a great discovery in Dentistry.

THE GREATEST ADVANCE STEP EVER MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the annoyance of food getting under the plate while sating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while eating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is, which is not true of any method hithertoused.

I have seenred Letters Patent for the United States, England and France.

The improvement is not in material, but in the construction, which seems the atmospheric pressure on the entire plate.

I have sold the exclusive of said improvement to Dr. L. Gilman, to wit, the Counties of Franklin, Washington, Chittenden, Lamoulle and Grand Isle, Those wishing to avail themselves of such improvement, will call on Dr. L. GILMAN,
